

# EMERGENCY INSTRUCTIONS

INSTRUCTIONS TO THE GENERAL PUBLIC NEAR ENEMALTA'S DELIMARA POWER STATION

	<b>ON HEARING THE SIRENS, YOU ARE TO FOLLOW THESE INSTRUCTIONS.</b>	The "DANGER" siren is a pulsing (hi-lo) sound that will sound for at least one minute.
	<b>Seek shelter by entering the nearest safe building.</b>	Enter the closest secure building; this will screen you from any external danger, such as high temperatures resulting from explosion/fire. Staying indoors will reduce traffic congestion and will keep streets clear for rescue operations.
	<b>Close doors and windows; turn off ventilation and other vents.</b>	Close windows, doors and louvers to protect yourself from the possible entry of flying glass resulting from further explosions. Stay in a room farthest away from the incident preferably with an exit to the outside. Do not stay behind doors and windows leading to outside.
	<b>Avoid unnecessary use of telephone and mobile.</b>	Telephone lines must not be overloaded so that people in real danger can contact the rescue services. Use the telephone ONLY if you require assistance.
	<b>Turn off any flames. Do not smoke.</b>	Flammable gas may be in the air.
	<b>Listen to the media.</b>	The "ALL CLEAR" siren is a continuous tone sounding for at least 1 minute. The authorities will also give advice on PBS radio and television.
	<b>Wait for the all-clear signal that indicates that the danger is over.</b>	The "ALL CLEAR" siren is a continuous tone sounding for at least 1 minute. The authorities will also give advice on PBS radio and television.
